### **Product Specification**

• Charging Plug: IEC 62196 Type2 • Rated Voltage: AC 230V / Single Phase Rated Current: 32A • Rated Power: 7.36kW Input Power: 250V Max • Operating Temperature: -35°C To 50°C 50/60Hz • Frequency: Electric Cable: IP65 Circuit Breaker • Highlight: single phase 7.3 kw ev charger,

Our Product Introduction

#### 32A Home Indoor/Outdoor AC EV Charger, Electric Vehicle Charging Station Compatible WithType 2 EVs

#### **Detailed Specification:**

Portable EV Charger, with power ratings of 3KW, 7 kW, is suitable for different types of vehicles.

Adjustable current, suitable for various scenarios.

The Voltage and Current are stable during charging, which can protect the battery and delay using time.

We can use normally in ultra-high temperature environment up to 50°C.

It can also be used normally in the -35°C.

#### EN Standard Strong Patience.

The charging cable meets the latest EN standard request of an electric vehicle charging cable. Highly resistant to the cold & heat,

with the cable maintaining flexibility at -40°c, therefore withstanding colder conditions. **TPU Cable.** 

Highly resistant to bending, protecting the internal wiring harness to function normally under repeated bending conditions. Climate Friendly Stronger & Anti-aging.

The halogen-free charging cable is climate friendly, meeting the EU's and USA's environmental standards. The tight, strong molecular structure provides a long-lasting charging cable solution, ensuring greater service life.

Arcing Design.

Unique self-cleaning' design ensures that impurities on the surface of the pins can be removed during each plug-in process. Ergonomic Design and Integrated Design

Angled horizontal bending design, in line with the habit of manual force which allows for convenient plugging & unplugging. K10 rated with an integrated design ensuring that you can charge safely in all weather conditions.

#### Better Conductivity.

Silver plating on the pins ensures greater conductivity, charging efficiency and reduces heat generation. Temperature Monitoring

Detects if the temperature is higher than the 'set safe' value, if this occurs, the current will automatically be cut off.

Model	W16EU-16A	W32EU-32A
Input / Output Voltage	AC 230V/ Single phase	AC 230V/ Single phase
Input / Output Current	8, 10, 12, 14, 16A adjustable	8, 10,12,14,16A, 20, 24, 28,32A adjustable
Max Output Power	3.68KW	7.36KW
Frequency		
Input Plug	Schuko	CEE 3-Pin
Output Plug	Type2(Mennekes)	
Output Cable	5M	
Withstand Voltage	3000V	
Work Altitude	<2000M	
Stand by	<3W	
Protection	over voltage protection, over load protection, over-tempprotection, under voltage protection, earth leakageprotection, lightning protection, short circuit protection	
IP level	IP65	
Touch Button	Yes	
LCD Screen	Yes	
Current Adjustmen t	Yes	
Timing / Appointme nt		
Certificatio n	CE, RoHS	

#### Feature:

1. The product complies with the Low Voltage Directive 2014/35/EU, IEC61851-1:2019

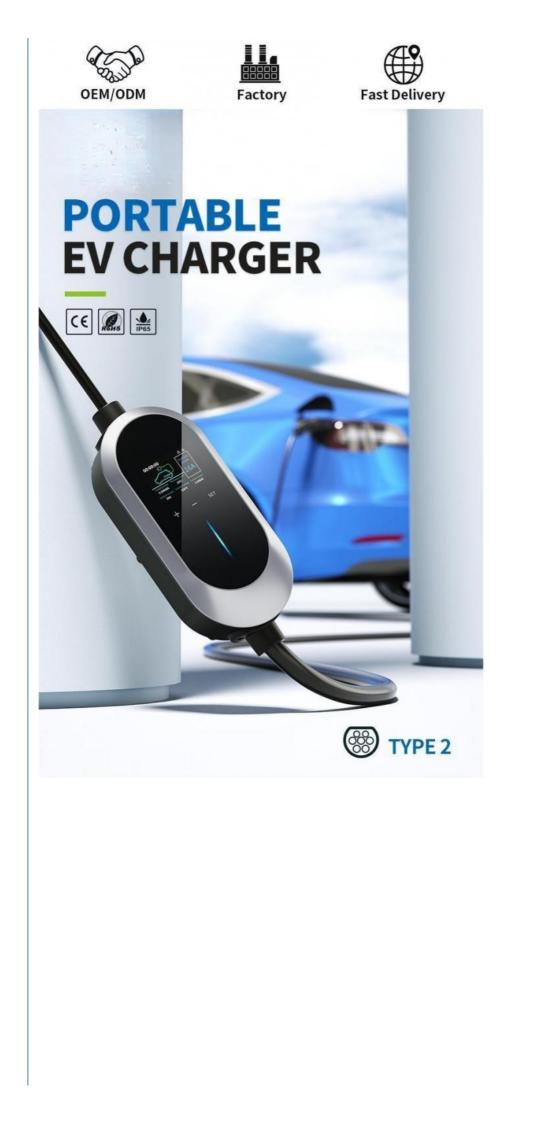

2.IP65, weatherproof; leakage protection; impact resistance

3. Charging status and working error are simply displayed by LED indicator light and LCD screen

4. Optional unction of current selection button,

5. 8A-32A free switching current
